

## **FM PRODUCTS ACCESSORIES FOR PLASTIC PIPE CLIPS**

**Material:** All accessories are made from heat resistant polypropylene, which withstands the temperature changes in central heating systems

### **Pipe Clip Reducer:**

Basically used to reduce a 22mm pipe clip to a 15mm pipe clip. It is mainly used in a double 22mm pipe clip to reduce one side to a 15mm clip when used in a run of two pipes where one pipe is a 22mm pipe and the other is a 15mm pipe.

### **Pipe Collars:**

Used to give a quick, low cost cover around a pipe which has been passed through a wall, ceiling or floor where the hole needs to be hidden. They are also used as a decorative finish in cubicles, on partitioning and around chrome pipe which is becoming more popular for example on many modern radiators and plumbing systems

- Available sizes in white are: 10mm, 15mm, 22mm & 28mm
- Available sizes in Chromed finish: 10mm, 15mm & 22mm

### **Pipe Clip Support Posts**

Used in conjunction with single Clip Lock or Open pipe clips they snap in at the bottom of the clip and effectively lift the clip by 25mm. This allows for lagging to be fitted around the pipe in accordance with byelaws introduced regarding minimum thicknesses of lagging that must be used. Support posts can be stacked to accommodate thicker lagging. Ensure a fixing screw is used that can pass through the pipe clip, the support post and then fully expand the length of the fixing plug.

- Available sizes in white are: 15mm & 22mm
